

We're coming to your school

Curriculum Tool helps teachers plan the Curriculum for Wales. If it will not open on your school network, this page shows your IT team how to let it through. It takes about two minutes.

If the website will not load

Some school networks block websites they do not recognise yet, which is why Curriculum Tool might not open for you. You do not need to fix anything technical yourself. Just send this page to whoever looks after your school's computers and network. Everything they need is below.

For your IT team

Curriculum Tool is a standard, secure website. To make it work on your network, please:

1. Allow our website

Permit *.curriculumtool.co.uk through your firewall and web filter.

2. Allow secure web traffic

Allow HTTPS over TCP port 443. This is normal, encrypted web traffic.

3. Use a modern browser

Any current version of Chrome, Edge, Safari or Firefox works. Nothing to install.

No special ports, no software to install, and no inbound access to your network is required.

If your filter needs each domain listed, allow the following over HTTPS (TCP 443):

Domain	What it's for
www.curriculumtool.co.uk	The application
p.curriculumtool.co.uk	Privacy-friendly analytics
media.curriculumtool.co.uk	Tutorial video
cdn.jsdelivr.net	JavaScript libraries
plausible.io	Privacy-friendly analytics
fonts.googleapis.com, fonts.gstatic.com, rsms.me	Web fonts

Allow our emails

Curriculum Tool sends sign-in links, password resets and notifications by email, from more than one address at our domain. So they all reach your staff, the simplest fix is to allowlist the whole domain in your mail filter:

Allow our domain: curriculumtool.co.uk

For example: mike.and.tom@curriculumtool.co.uk

Our email is sent through Postmark and is SPF and DKIM authenticated, so it is safe to allow.

What is Curriculum Tool?

A curriculum planning tool built for schools in Wales.

Made by educators in Wales

Built by Mike Glavin and Tom Meehan to help teachers plan and deliver the Curriculum for Wales.

Your data is kept safe

Hosted in the UK and EU. We are GDPR compliant, registering with the ICO, and can provide a Data Processing Agreement.

No pupil records

Teachers use it to plan their curriculum. We hold staff accounts and curriculum plans, not pupil personal data.

Secure and accessible

Cyber Essentials certified, served only over encrypted HTTPS, and built to WCAG 2.2 AA accessibility standards.

Need a hand?

Email us and we'll happily help your IT team get set up.

mike.and.tom@curriculumtool.co.uk
